ENVIRODRI GEN4 REPLACEMENT BRUSHES

Description:

Brushes for the Envirodri Gen4 dry carpet cleaning machine.

We offer five different grades of brush for the envirodri GEN4 ensuring that all carpet types are cared for to produce an outstanding professional finish.

Brushes are sold in packs of two.

Soft brush (Gold):

The gold brush is mainly used for very delicate residential carpets where long soft fibres are found. Use on wool and wool berber carpets to avoid damage.

Soft intermediate brush (Gold/white):

The gold and white bristle brush is best used for 100%, 80/20 and 50/50 wool carpets. Excellent for cleaning rugs such as Orientals and Persians.

Standard brush (White):

This white bristle brush is the most versatile of all the brushes, effective on both residential and commercial carpets. It can be used on virtually all carpets except for delicate wool and wool berber carpets and rugs. Especially effective on moderately soiled cut pile carpets.

Stiff intermediate brush (Black and white):

This brush has a combination of stiff and standard bristles (black and white) so that it is effective in not only cleaning moderate to heavily soiled carpets but is also effective in lifting crushed carpet tiles. Great on both loop and cut pile carpets.

Stiff brush (Black):

The black stiff bristle brush is the most aggressive brush and care must be taken to not damage the carpet whilst cleaning. Excellent for heavily crushed commercial polypropylene carpets. Used predominantly on heavily soiled carpets.

Ordering codes:

Brushes - Soft (Gold)	GEN4G
Brushes - Soft/Intermediate (Gold/White)	GEN4GW
Brushes - Standard (White)	GEN4W
Brushes - Stiff/Intermediate (Black/White)	GEN4BW
