PRO 35 BIOLOGICAL EXTERIOR HARD SURFACE CLEANER

For use on all washable porous & non-porous external surfaces including:

- ✓ Wood
- ✓ Metal
- ✓ Stone
- ✓ Concrete
- ✓ Artificial grass
- ✓ Safety matting
- ✓ Glass
- ✓ Canvas
- ✓ Plastic

Description:

Pro 35 Biological Exterior Hard Surface Cleaner is an advanced, multi-surfactant and microbiological cleaner suitable for use on virtually any external surface.

The live ingredients in this formulation have been specifically selected for their ability to rapidly degrade organic dirt and grime that builds up on hard surfaces.

Unlike traditional external surface cleaners, Pro 35 has the added benefit of acting as a powerful odour neutraliser which especially helps to keep porous surfaces clean and free of unpleasant odour.

Continuous use of this product makes onward cleaning quicker and easier as the active ingredients continue to clean & remove grime long after initial application.

Benefits:

- Pro 35 is free from toxic chemicals and environmentally friendly.
- Offers long term and effective removal of residual organic matter.
- Breaks down oil, grease, fat, starch and solid organic matter.
- Removes malodours at source.

Hand cleaning: Dilute product into a trigger spray bottle and apply a fine mist onto the soiled area. Agitate using a cloth or brush. Allow a couple of minutes contact time. No rinsing is required.

Washing, mopping, brushing: Prepare a solution of product in a bucket. Using a cloth, sponge, or mop apply to the surface and agitate. Give a couple of minutes contact time. No rinsing required.

Scrubbing: Pro 35 is a low foaming non-corrosive solution which can be used in conjunction with commercial jet washers and scrubbing equipment. Always follow the instructions of the manufacturer - prepare solution in equipment according to recommended dilutions.

Note: Pro 35 can be used on all surfaces that can be cleaned with water. However, as with all cleaning products, it is always wise to test on a small inconspicuous area before general application.

Application guidelines:

The choice of dilution depends on the area to be cleaned and the level of soiling.

Heavily soiled areas / hand cleaning:	Dilute 1:4	1 part chemical to 4 parts water
Deep machine cleaning:	Dilute 1:40	1 part chemical to 40 parts water
Regular machine cleaning:	Dilute 1:80	1 part chemical to 80 parts water

Note: If used in conjunction with a jet washer this product can be diluted up to 1:150.

PRO 35 BIOLOGICAL EXTERIOR HARD SURFACE CLEANER

Dilution guide:

For each dilution add the amount of chemical as directed below with either a measuring jug or 30ml shots from a pelican pump dispenser. Top up the remainder of the container with fresh water. Note: These dilutions are approximate and serve as a guideline for optimum product performance. Depending on the equipment used, level of soiling and frequency of cleaning dilutions can be increased/decreased to individual requirements. We do not recommend exceeding a dilution of 1:150.

			
	500ml spray	Standard bucket (20L)	Cleaning machine (10L)
1:4	100ml / 3 shots	5l / 168 shots	N/A
1:40	N/A	N/A	250ml / 9 shots
1:80	N/A	N/A	125ml / 5 shots

Contains:

CAS No: 2634-33-5 1,2 Benzisothiazolin-3-one

CAS No: 68439-45-2 Alcohol Ethoxylate

CAS No: 68989-03-7 Quaternary Ammonium Compounds

Care:

May produce an allergic reaction. Causes serious eye irritation. Wash hands thoroughly after handling. Wear eye protection. IF IN EYES: Rinse cautiously with water for several minutes, remove contact lenses if present and easy to do so. If eye irritation persists: Get medical attention.

Keep out of the reach of children.

State	Liquid
Appearance	Colourless, slightly hazy
Odour	Pleasant
Solubility	Miscible in all proportions

Available sizes and ordering codes:

6 x 500ml Ready to use bottles	PRO35-6x500
2 x 5l Concentrate	PRO35-2x5
