

## TECHNICAL DATA

### PRO 59 BIOLOGICAL MOSS & ALGAE REMOVER

For use on virtually any external surface including:

- ✓ Wood
- ✓ Metal
- ✓ Concrete
- ✓ Tarmac
- ✓ Artificial Grass
- ✓ Safety Matting
- ✓ Glass
- ✓ Canvas
- ✓ Plastic

#### Description:

Pro 59 Biological Algae and Moss Remover is an external surface cleaner specifically formulated to treat and clean areas where there is a build-up of moss and algae. After the first application Pro 59 continues to break down organic matter extending the period between cleans.

This product can also be used on surfaces where there is a build-up of guano from bird life.

#### Benefits:

- Pro 59 deals with algae growth by digesting the organic material on which it would normally settle.
- The most economical way to keep surfaces clean and slip-free for longer.
- Ideal for a wide range of surfaces.
- Caustic acid and solvent free.

#### Instructions for use:

**Trigger spray:** Dilute product into a trigger spray bottle and apply directly to surfaces to be cleaned. Agitate with a cloth or stiff brush. Rinse only if required.

**Washing or mopping:** Prepare a solution of product in a bucket. Using a cloth, sponge, brush or mop apply to the surface and agitate. Rinse only if required.

**Scrubbing:** Pro 59 is a low foaming solution which can be safely used in conjunction with commercial jet washers and scrubbing equipment. Prepare solution in the equipment following the recommended dilutions. Always follow the instructions of the machine manufacturer.

Note: Pro 59 Biological Moss and Algae Remover can be used on all surfaces that can be cleaned with water. However, as with all cleaning products, it is always wise to test on a small inconspicuous area before general application.

#### Application guidelines:

The choice of dilution depends on the area to be cleaned and the level of soiling.

Heavily soiled surfaces:	<b>Dilute 1:4</b>	1 part chemical to 4 parts water
Manual cleaning:	<b>Dilute 1:8</b>	1 part chemical to 8 parts water
Deep machine cleaning:	<b>Dilute 1:40</b>	1 part chemical to 40 parts water
Regular machine cleaning:	<b>Dilute 1:80</b>	1 part chemical to 80 parts water

## TECHNICAL DATA

### PRO 59 BIOLOGICAL MOSS & ALGAE REMOVER

#### Dilution guide:

For each dilution add the amount of chemical as directed below with either a measuring jug or 30ml shots from a pelican pump dispenser. Top up the remainder of the container with fresh water. Note: These dilutions are approximate and serve as a guideline for optimum product performance. Depending on the equipment used, level of soiling and frequency of cleaning dilutions can be increased/decreased to individual requirements. We do not recommend exceeding a dilution of 1:150.

			
	500ml spray	Standard bucket (20L)	Cleaning machine (10L)
<b>1:4</b>	100ml / 3 shots	5l / 168 shots	N/A
<b>1:8</b>	55ml / 2 shots	2.2l / 73 shots	N/A
<b>1:40</b>	N/A	N/A	250ml / 9 pumps
<b>1:80</b>	N/A	N/A	125ml / 5 shots

#### Contains:

CAS No: 68439-45-2 Alcohol Ethoxylate  
CAS No: 68989-03-7 Quaternary Ammonium Compounds  
CAS No: 2634-33-5 1,2 Benzisothiazolin-3-one

#### Care:

May produce an allergic reaction. Causes serious eye irritation. Wash hands thoroughly after handling. Wear eye protection. IF IN EYES: Rinse cautiously with water for several minutes, remove contact lenses if present and easy to do so. If eye irritation persists: Get medical attention. Keep out of the reach of children.

State	Liquid
Appearance	Colourless, slightly hazy
Odour	Pleasant
Relative density	1.00
Solubility in water	Miscible in all proportions

#### Available sizes and ordering codes:

6 x 500ml Ready to use bottles	PRO59-6x500
2 x 5l Concentrate	PRO59-2x5
1 x 20l Concentrate	PRO59-20
